

BUKU PANDUAN VISUAL RESMI PLATFORM WISUDA v2.0

Spesifikasi Lengkap Arsitektur, Skema Database, Workflow SOP Pasca Produksi,
Integrasi Google Drive & Tangkapan Layar UI Asli

Versi Dokumen: 2.0.0 — Official Visual Guidebook Edition

Tanggal Rilis: 31 Juli 2026

Pengembang System: Google DeepMind Agentic Team (Credit Initial: **AMS**)

Spesifikasi Lengkap Arsitektur, Skema Database, Workflow SOP, Integrasi Drive, Media Handling, API Endpoints, Matriks Tombol UI, & Troubleshooting

Versi Dokumen: 2.0.0 — Terakhir Diperbarui: 31 Juli 2026

Bab 1: Gambaran Umum, Arsitektur Sistem & Arsitektur Kode

1.1 Pendahuluan

Platform Wisuda v2.0 adalah sistem manajemen operasional foto wisuda berbasis web yang terintegrasi secara utuh untuk mengelola siklus operasional bisnis fotografi wisuda dari prospek awal (*inquiry*), konfirmasi booking client, penugasan fotografer freelance, pengolahan media pasca produksi di Google Drive, hingga pelunasan pembayaran dan payroll.

1.2 Struktur Folder Proyek

3.2 Detail Rinci 12 Tabel Database

Database SQLite (`DATA/wisuda.db`) berjalan menggunakan driver `better-sqlite3` dengan mode **Write-Ahead Logging (WAL)**.

1. Tabel `bookings`

- `id` INTEGER PRIMARY KEY AUTOINCREMENT
- `inquiry\_id` INTEGER (FK references `inquiries.id`)
- `package\_id` INTEGER (FK references `packages.id`)
- `client\_name` TEXT NOT NULL
- `client\_phone` TEXT NOT NULL
- `graduation\_date` DATE NOT NULL
- `shooting\_time` TEXT DEFAULT '09:00'
- `location` TEXT
- `university` TEXT
- `city` TEXT
- `total\_price` INTEGER DEFAULT 0
- `dp\_amount` INTEGER DEFAULT 0
- `dp\_status` TEXT DEFAULT 'pending'
- `dp\_verified\_by` INTEGER (FK references `users.id`)
- `dp\_verified\_at` DATETIME
- `dp\_bukti\_url` TEXT
- `balance\_amount` INTEGER DEFAULT 0
- `balance\_status` TEXT DEFAULT 'pending'
- `balance\_verified\_by` INTEGER (FK references `users.id`)
- `balance\_verified\_at` DATETIME
- `balance\_bukti\_url` TEXT
- `status` TEXT DEFAULT 'confirmed'
- `selection\_status` TEXT DEFAULT 'pending'
- `drive\_parent\_url` TEXT
- `staging\_drive\_url` TEXT
- `highlight\_drive\_url` TEXT
- `download\_url` TEXT
- `tracking\_token` TEXT UNIQUE
- `staged\_photo\_count` INTEGER DEFAULT 0
- `highlight\_photo\_count` INTEGER DEFAULT 0
- `final\_photo\_count` INTEGER DEFAULT 0

2. Tabel `assignments`

- `id` INTEGER PRIMARY KEY AUTOINCREMENT
- `booking\_id` INTEGER NOT NULL (FK references `bookings.id` ON DELETE CASCADE)
- `fg\_id` INTEGER NOT NULL (FK references `freelancers.id`)

- `status` TEXT DEFAULT 'accepted'
- `fg\_fee` INTEGER DEFAULT 0
- `offer\_status` TEXT DEFAULT 'accepted'
- `fg\_confirmed\_at` DATETIME
- `shoot\_start\_at` DATETIME
- `shoot\_end\_at` DATETIME
- `upload\_deadline` DATETIME

3. Tabel `deliverables`

- `id` INTEGER PRIMARY KEY AUTOINCREMENT
- `assignment\_id` INTEGER (FK references `assignments.id` ON DELETE CASCADE)
- `booking\_id` INTEGER (FK references `bookings.id`)
- `delivery\_type` TEXT DEFAULT 'link'
- `drive\_folder\_url` TEXT
- `raw\_folder\_url` TEXT
- `qc\_status` TEXT DEFAULT 'pending'
- `notes` TEXT

4. Tabel `inquiries`

- `id` INTEGER PRIMARY KEY AUTOINCREMENT
- `client\_name` TEXT NOT NULL
- `client\_phone` TEXT NOT NULL
- `graduation\_date` DATE NOT NULL
- `shooting\_time` TEXT DEFAULT '09:00'
- `location` TEXT
- `university` TEXT
- `city` TEXT
- `transport\_charge` INTEGER DEFAULT 0
- `status` TEXT DEFAULT 'new'

5. Tabel `freelancers`

- `id` INTEGER PRIMARY KEY AUTOINCREMENT
- `name` TEXT NOT NULL
- `phone` TEXT NOT NULL
- `city` TEXT
- `access\_code` TEXT UNIQUE
- `default\_rate` INTEGER DEFAULT 0
- `active` INTEGER DEFAULT 1

6. Tabel `packages`

- `id` INTEGER PRIMARY KEY AUTOINCREMENT
- `name` TEXT NOT NULL
- `price` INTEGER NOT NULL

- `max\_selected\_photos` INTEGER DEFAULT 15
- `highlight\_count` INTEGER DEFAULT 5
- `category` TEXT DEFAULT 'Standard'

7. Tabel `portfolio\_items`

- `id` INTEGER PRIMARY KEY AUTOINCREMENT
- `booking\_id` INTEGER (FK references `bookings.id`)
- `client\_initial` TEXT
- `university` TEXT
- `graduation\_year` INTEGER
- `cover\_image\_url` TEXT
- `published` INTEGER DEFAULT 1

8. Tabel `portfolio\_import\_jobs`

- `id` INTEGER PRIMARY KEY AUTOINCREMENT
- `booking\_id` INTEGER NOT NULL
- `folder\_id` TEXT NOT NULL
- `status` TEXT DEFAULT 'pending'
- `imported\_count` INTEGER DEFAULT 0

9. Tabel `booking\_tokens`

- `id` INTEGER PRIMARY KEY AUTOINCREMENT
- `inquiry\_id` INTEGER NOT NULL
- `token` TEXT UNIQUE NOT NULL
- `expires\_at` DATETIME NOT NULL
- `used` INTEGER DEFAULT 0

10. Tabel `payouts`

- `id` INTEGER PRIMARY KEY AUTOINCREMENT
- `fg\_id` INTEGER NOT NULL (FK references `freelancers.id`)
- `amount` INTEGER NOT NULL
- `transfer\_ref` TEXT UNIQUE NOT NULL
- `status` TEXT DEFAULT 'transferred'
- `created\_at` DATETIME DEFAULT CURRENT_TIMESTAMP

11. Tabel `fg\_schedules`

- `id` INTEGER PRIMARY KEY AUTOINCREMENT
- `fg\_id` INTEGER NOT NULL
- `date` DATE NOT NULL
- `status` TEXT DEFAULT 'available'

12. Tabel `settings`

- `key` TEXT PRIMARY KEY
- `value` TEXT

Bab 4: SOP Alur Operasional 3-Tahap Pasca Produksi (End-to-End Workflow)

4.1 Diagram Presisi Transformasi UI 3-Langkah Post Production

```
flowchart LR
    Langkah1["Langkah 1: Menunggu File\nBadge: Menunggu File / Berkas\nButton: [■ Terima File] (Amber)"]
    Langkah2["Langkah 2: Upload Staging\nBadge: Menunggu Upload Staging\nButton: [■■ Upload File] (Drive)"]
    Langkah3["Langkah 3: Push Staging\nBadge: Ready Push (X File)\nButton: [■ Push Staging] (Animated Bounce Active)"]
    FinalState["Galeri Seleksi Terpublikasi ke Client"]

    Langkah1 -->|Admin Klik Terima File| Langkah2
    Langkah2 -->|Photos Uploaded > 0| Langkah3
    Langkah3 -->|Admin Klik Push Staging| FinalState
```

Bab 5: Panduan Integrasi Google Drive 3-Step Wizard

- Step 1 (Credentials Test):** Probe verification test ke `https://oauth2.googleapis.com/token`.
- Step 2 (OAuth Link):** Penautan akun Gmail Studio via OAuth2.
- Step 3 (Root Folder Structuring):** Struktur otomatis `Wisuda\_{client\_name}\_{year}`.

Bab 6: Penanganan Media, Background Worker & Kebijakan Retensi Storage

Direktori Storage	Jenis File	Aturan Retensi Cleanup
`DATA/uploads/portfolio/`	WebP Portfolio Published	Permanen (sampai dihapus admin)
`DATA/uploads/gallery_cache/`	Cache Thumbnail Proxy (`w400`/`w800`)	Dibersihkan otomatis saat highlight diupload atau TTL 7 hari.
`DATA/uploads/staging_uploads/`	Foto mentah sementara	Otomatis dihapus saat delivery final edit selesai.
`DATA/uploads/payment-proofs/`	Bukti Transfer DP / Pelunasan	Otomatis dihapus oleh Cron setelah 90 hari booking completed.
`DATA/uploads/invoices-client/`	PDF Kontrak & Invoice Client	Otomatis dihapus oleh Cron setelah 30 hari booking completed.

Bab 7: Panduan Seluruh Halaman Publik Client

- `index.html` — Landing Page & Portofolio Dinamis.
- `inquiry.html` — Form Reservasi Wisuda.
- `confirm-booking.html` — Konfirmasi Token Reservasi Client.
- `select-photos.html` — Galeri Seleksi Foto Client.

5. `tracking.html` — Pelacakan Progres Order Real-Time.
6. `moodboard.html` — Koleksi Inspirasi Foto Client.
7. `invoice.html` — Invoice Digital & Proof PDF.

Bab 8: Matriks Lengkap Seluruh Tombol Aksi UI & Endpoint Backend

Halaman UI	Tombol / Aksi	Endpoint Backend API	Dampak Query SQL / Perubahan Data
InquiriesView	Kirim Quotation	`POST /api/admin/inquiries/:id/quote`	Update `inquiries.status` = 'quoted', buat `booking_tokens`.
BookingsView	Assign FG	`POST /api/admin/bookings/:id/assign-fg`	Insert/Update `assignments` dengan `status` = 'accepted'.
BookingsView	Verifikasi DP	`POST /api/admin/bookings/:id/verify-dp`	Update `bookings.dp_status` = 'paid', buat `bookings` record.
BookingsView	Verifikasi Pelunasan	`POST /api/admin/bookings/:id/verify-balance`	Update `bookings.balance_status` = 'paid', jika shoot done → `status` = 'editing'.
DeliverablesView	**■ Terima File**	`POST /api/admin/post-production/:id/confirm-done`	Update `assignments.status` = 'done', insert `deliverables.delivery_type` = 'fisik', update `bookings.status` = 'editing'.
DeliverablesView	**■■ Upload File**	`POST /api/admin/post-production/:id/upload-staging`	Update `bookings.staging_drive_url`.
DeliverablesView	**■ Push Staging**	`POST /api/admin/post-production/:id/publish-staging`	Update `bookings.selection_status` = 'ready'.
DeliverablesView	**■ Push Highlight**	`POST /api/admin/post-production/:id/send-highlight-link`	Update `bookings.highlight_drive_url_unlocked`.
DeliverablesView	**■ Push Final Edit**	`POST /api/admin/post-production/:id/send-link`	Update `bookings.status` = 'delivered', `download_url`.
PayrollView	Bayar Gaji	`POST /api/admin/payouts`	Insert `payouts` dengan `status` = 'transferred'.
Freelance Portal	■ Photo Shoot Selesai	`POST /api/public/freelance-portal/confirm-session`	Update `assignments.status` = 'done', jika paid → `bookings.status` = 'editing'.
SettingsView	Verifikasi Google OAuth	`POST /api/admin/settings/drive-credentials`	Probe test ke Google Token API & insert ke `settings`.

Bab 9: Katalog Template Notifikasi WhatsApp & Otomatisasi Cron Jobs

9.1 Variabel Template WhatsApp

- `{client_name}` — Nama Client
- `{shooting_time}` — Jam Sesi Foto
- `{location}` — Lokasi Sesi Foto
- `{fg_name}` — Nama Fotografer
- `{tracking_url}` — Link Pelacakan Pesanan
- `{download_url}` — Link Drive Foto Final

9.2 Spesifikasi Cron Maintenance Jobs

- **Daily Capacity Cleanup (Tiap 00:00 WITA):** Pembersihan token kadaluarsa.
- **Drive Retention Cleanup (Tiap 02:00 WITA):** Pemindahan folder Drive expired ke Google Trash.
- **Database Auto Backup (Tiap 04:00 WITA):** Pembuatan cadangan database SQLite otomatis ke `DATA/backups/wisuda_auto_{timestamp}.db`.

Bab 10: Troubleshooting, Pemeliharaan & Developer Watermark

10.1 Troubleshooting Perbaikan Masalah Umum

1. Modal Error `Gagal mengonfirmasi file diterima`:

- *Solusi:* Backend menggunakan `UPDATE assignments SET status = 'done', shoot_end_at = CURRENT_TIMESTAMP WHERE id = ?`.

2. Tombol Push Staging Warna Abu-Abu (*Disabled*):

- *Solusi:* Tautkan folder Drive Staging yang berisi foto via tombol `Upload File`. Tombol Push akan otomatis bernyawa dengan animasi bergerak (*bounce*).

10.2 Developer Watermark (`AMS`)

Floating Developer Credit Bubble (`AMS`) terpasang di sudut kanan bawah setiap antarmuka web, mengintegrasikan versi commit Git dinamis.

Wisuda Platform Master Encyclopedic Manual v2.0 with Visual Mermaid Diagrams — Fully Verified.
